MASSACHUSETTS NORMAL ART SCHOOL.

IN view of the great importance of drawing as a branch of education, the Legislature, by an Act passed May 16, 1870, made instruction in this branch obligatory in the public day-schools, and required cities and towns containing more than ten thousand inhabitants to make provision for free instruction in industrial drawing to persons over fifteen years of age. This Act met with much public favor, but it was soon found that it was impossible to realize satisfactorily the benefits intended by the Act for want of competent teachers. An Act was therefore passed by the Legislature providing for the establishment and maintenance by the Board of Education of a State Normal Art School. In pursuance of this provision, this circular has been prepared for the information of those interested.

DESIGN OF THE SCHOOL.

This School is intended as a Training School for the purpose of qualifying teachers and masters of industrial drawing. Its specific aim at present is to prepare teachers for the industrial drawing schools of the State, who shall also be able to direct and superintend the instruction in this branch in the public schools. In the future it may be necessary to provide for high skill in technical drawing and art culture, but the immediate pressing demand is for teachers who know the elementary subjects thoroughly, and can teach them intelligently and successfully; and this demand the School will aim primarily to supply, making its training as complete and practical as the circumstances will permit.

LOCATION.

School Street Block, No. 28 School Street, opposite the City Hall, Boston.

CONDITIONS OF ADMISSION AND FEES.

An examination in Freehand Drawing of Ornament from Copy, and Object Drawing from the solid, will be held at the beginning of each term, of all candidates for admission to Class A. After the end of the school year 1878-9, the examination for admission will consist of exercises in Freehand Drawing, from the flat and the round, Geometrical

and Perspective and Memory Drawing of an original design made by the applicant; and students will be advanced to either of the other classes upon passing the examination prescribed therefor. To students residing within the State, tuition is free; but ten dollars per term will be charged for incidentals. To students from without the State, fifty dollars per term. All fees are payable, in advance, to the Curator at the commencement of each term.

COURSE OF INSTRUCTION.

The term Industrial Drawing includes both Instrumental and Free-hand Drawing. The former will be taught by lectures given by the lecturers on the various subjects; and the latter, by individual instruction by the instructors, who will also superintend the artistic work in the studios, comprising Freehand Drawing, Painting, and Designing. The work of Class A is devoted to Elementary Drawing; of Class B, to Form, Color, and Industrial Design; of Class C, to the Constructive Arts; and of Class D, to Sculpture and Design in the round. These groups of subjects can be studied in any order after Class A has been passed through, subject only to an examination as to the fitness of the student.

SCHOOL YEAR.

The school year begins the first week in October, and closes with the graduation exercises near the end of June. The year is divided into two terms: the first term comprises the months of October, November, December, and January; the second term, the months of February, March, April, May, and part of June.

SESSIONS AND VACATIONS.

Instruction is given from 9 A. M. to 12 M., and from 1 to 4 P. M., on Monday, Tuesday, Wednesday, Thursday, and Friday. Students are expected to attend punctually and regularly in their classes during the hours of instruction; and tardiness and irregularity will be recorded, and be regarded as sufficient grounds for suspension or dismissal.

The vacations and holidays are:—One week from Christmas Day; New Year's Day; the twenty-second of February; Fast Day; Decoration Day; Thanksgiving Day, and the remainder of the week; and from February 1st to 7th, inclusive.

EXAMINATION AND CERTIFICATES.

For permission to be examined for a Certificate, the student will be required to submit class exercises, the subjects being described in the list of certificate drawings. These drawings, painting, and models

are to show whether the student possesses the manipulative skill necessary to teach industrial art. If the works pass examination, the student will then be allowed to offer himself for the certificate examination, which will be held at the end of each school year. This examination having been passed, the student will receive a Certificate, testifying to his scientific and artistic qualifications to give instruction in the group of studies passed. A student failing to pass an examination in any subject may present himself again at a future examination, those subjects already passed being recorded in his favor; but he will not receive the Certificate of the School until all the subjects of examination have been passed.

The Diploma of the School will be granted to those students only who complete the subjects of study, and pass the examination in Classes A, B, C, and D.

APPOINTMENT CLASS.

Qualified students of the Classes B, C, and D will be selected to act as Assistants to the Instructors in Class A for at least one week in each term, as a part of their training, and from the monthly reports on their conduct and efficiency, made to the Director by the Instructors, recommendations for appointments as teachers will be made.

It must, however, be distinctly understood by students of the School that neither the School nor its officers undertake any responsibility with regard to securing appointments for the students, the School being a training school, not an agency to secure employment for teachers of drawing.

Applications from schools or colleges for teachers of drawing will be brought to the attention of such students in the appointment class as the Director thinks competent to do the work required; but such applications and recommendations have nothing official in connection with the School.

REGULATION CONCERNING STUDENTS

WHO HAVE RECEIVED APPOINTMENTS AND WHO DESIRE TO CONTINUE THEIR STUDIES AND OBTAIN THE ADVANCED CERTIFICATES.

Students who have taken Certificate A, and whose appointments as teachers of drawing prevent their attendance at the School, upon presenting the required works for Certificate B, and giving satisfactory evidence that the works are their own production, will be treated as though in attendance in the School, if the regular fees are paid by them. Their works for Certificate B will be examined, and if accepted, the students presenting them may offer themselves for the time examination to complete their Certificates. The same rule applies to those who desire to obtain Certificates C and D.

CERTIFICATE WORKS.

One work from the certificate set of each student will be retained as the property of the School, and the best set in each year will be also retained and kept in the School. The student who produces the best set of certificate works will have a Certificate testifying to the fact of his works having been selected as the best in the year.

Students who leave the School before completing the set of certificate works required in any class will not be allowed to take such works from the School, unless they are employed to teach drawing and file a statement of that fact with the Curator.

Having passed the examinations in a class, and completed the works students will not be allowed to continue for practice in the same class; or having failed to pass through the class within two years, will be considered as no longer belonging to it, though they may join another, class, by permission of the Director.

NOTICE CONCERNING CERTIFICATE WORKS.

Four of the eight certificate models are to be of imperial size, or in the round, and to be cast in plaster, and painted, before being sent in as complete.

They will, however, be examined and accepted or rejected before being cast.

The remaining four models need not be cast. One of the cast works is to be an example of bass-relief, one of mezzo or mixed relief, one in alto relief, and one in the round, a statuette or bust, original, or from the life, or the antique. One half the cost of casting the four selected works will be paid by the school.

REGULATIONS OF THE SCHOOL.

The only works allowed to be executed in the School are those required by the lecturers or instructors to illustrate their lectures or lessons, or those on the list of certificate works.

The certificate works must be made on half-imperial sheets of paper or canvas ($15 \times 21\frac{1}{2}$), except in Class C, which must be on imperial sheets.

All materials and apparatus required are to be provided by the students at their own cost; no examples for instruction can be removed from the school by the students; and any damage done to the property of the School will have to be made good by the teacher in whose class it occurs, and who is authorized to recover the cost of damage from the student causing it.

The attendance of the students will be registered daily, and absence from the classes must be explained to the instructors.

At the class lectures the sketches and illustrations made or used by the lecturers or instructors are to be reproduced by each student, accompanied by such written descriptions as may be deemed necessary.

There will be a recess from 12 to 1 during the morning session.

Each lecturer will require a certain amount of work to be done by the students between one lecture and another. This must be regarded as a part of the school work, as much so as that done in the lecture-room or studio.

The text-books used or required for reference will be indicated by the lecturer of the several subjects. Any certificate work which, in the opinion of the Director, does not show sufficient skill to qualify the student to teach the subject, will be rejected, and another must be made.

Every student will be provided with a locker, in which to keep boards and drawing materials. On receiving the key, the student must deposit one dollar as a guarantee that the key will be returned; when it is returned, the money will be repaid.

A student can be advanced from one class to another only on completion of the whole set of certificate works of the class he is in, and a student who passes any subject of examination cannot be re-examined in the same.
